Subject: Microsoft Settlement

Dear Attorney General Ashcroft:

I support the recent antitrust settlement and hope that it comes to fruition as soon as possible. Although, I believe that Microsoft did not make any antitrust violation, I believe this is the quickest and best way to end this Clinton era witch hunt.

Under the terms of the settlement, there are generous provisions that will allow software developers and computer makers to more effectively promote their own products. Also Microsoft has agreed to disclose technology and design future versions of Windows' with competitive handicaps. As a shareholder I am paying the price for this and I don't like it but it is more important to settle and get this behind us.

Before the matter is settled I ask your office to attack the nine states that want to continue litigation. They are showcasing for political and self-interest reasons and not thinking about what is in the best interest of the American people and American economy. Settle!

Thank you.

Sincerely,

Chris Zahnle
